Proposed Project Title: MY TO-DO LIST

Abstract:

This to-do list application, developed using HTML, CSS, and JavaScript, allows users to effectively manage their tasks. Users can add new tasks, edit existing ones, and delete tasks when completed or no longer needed. The app also includes a login feature that requires users to enter their username and password to access their personal task list. Once all tasks are marked as complete, a celebratory confetti star animation is triggered. With its clean, simple design and easy-to-use functionality, this application provides an enjoyable experience for staying organized.

Official Use

Group No: 17	Section: E	Category: My To-Do List project is a web-based productivity tool focused on task management and organization.
